

The AP 5.4 is very versatile. It prints type plates, self-adhesive labels, paper, card and plastic such as PE, PP, PVC and PA at high speed. Your labels for all sorts of applications are produced quickly and simply.

Simple operation and straightforward operating controls make it easy to work with the AP 5.4. Labels and ribbons can be changed very easily, since the material feed opens at the side. No tools or accessories are required to change print heads or print rollers. The print pressure of the printhead can be varied very easily using the adjustment screw. In addition, the graphical display shows status messages and menu guidance in a user-friendly manner.

Depending on your requirements, the AP 5.4 can print fonts, standardized symbols and barcodes on a range of different materials. The intelligent and robust design and well thought-out features are an additional bonus: For example, the print module for the material feed and the easily maintained printhead as well as the moveable reflex light sensor. The AP 5.4 is equipped with an Ethernet connection which makes it easy to deploy it as part of your system. Alternatively, it can be used offline in your work processes. A wide range of accessories: For example, cutters, rewinders and dispensers ensure that your processes are optimized and also allow you to post-process the labels.

### **Specifications**

Printhead	Flat Head	
Print Resolution	203 / 300 dpi	
Print Speed	50 - 200 / 50 - 150 mm/s	
Print Width	105 mm	
Material Width	Up to 120 mm	
Material Supply	210 mm	
Ribbon Feed Capacity	Up to 500 M	
Standard Fonts	17 + 2 scalable	
Standard Barcodes		
2D Barcodes		
Emulation	Easy Plug, Lineprinter, Hexdump, ZPL	
CPU	32 bit	
Interfaces	Parallel Centronics, Serial RS 232, Ethernet, USB Optional: RS 422, RS 485 Webserver, FTP-Server	
Accessories	Cutter Dispenser Rewinder Half-size sensor	Reflex sensor Real-time clock Stand-alone function RFID Kit
Weight	14 kg	
Dimensions	272 x 260 x 462 mm
