Technical Specification

For small to mid-size business owners, the freedom of dependable wireless devices has been priced out of reach due to features and functionality that are just not necessary for basic data collection tasks. For simple point-to-point connectivity (single reader to single base station), the QuickScan Mobile reader offers security and reliability with Datalogic's STAR Cordless System. It's fast, easy to use and guaranteed Wi-Fi interference free. Outstanding bar code reading performance and reliability make the QuickScan Mobile reader ideal for use at the point of sale, plus this multi-purpose device can also double for inventory, price checking and shelf replenishment activities. A 12 m / 40 ft radio range provides a wide working area and eliminates the restraints caused by cabled devices, providing a safer and more efficient work environment. The QM2100's cradle provides hands-free reading capabilities and a scan-while-charging feature ensures constant up-time for increased productivity. Datalogic's patented Batch Mode combined with a long lasting lithium-ion battery allows for reliable data collection when out-of-range from the base station. Standard multi-interface capabilities (QM2130) provide host connectivity via USB, RS-232, Keyboard Wedge and Wand Emulation while IBM interface models (QM2110) provide connectivity via IBM46XX, USB and RS-232 emulation. Convenient Plug & Scan kits provide for easy installation and include everything required to get up and running quickly.
